16. **Click Case Manager in the sidebar** —
17. **Fill in Create New Case** — Select client, enter case ref (e.g. DC-2025-003), type, counsel
18. **Enter court name and filed date if known** —
19. **Click Create Case** — The case appears in the list below
20. **Click Manage → to open the case editor** —

Updating Case Timeline (Most Important Task)

The timeline is what the client sees in their portal. Keep it updated after every development.

21. **Open the case via Manage →** —
22. **In the Timeline section, find the current step** — It shows as  Current
23. **Change its status to Done ** — Use the dropdown on the right of the step
24. **Add the next step using the form below** — Enter date, title, description, set status to Current
25. **Update Next Date and Next Event at the top** — E.g. "June 12, 2025" and "Court Hearing – 9:00 AM"

26. **Click Save Case Info** —
27. **Send a message to the client explaining the update** — Use the Messages section below

The client sees all changes immediately on their next login. Always send a message after updating the timeline so the client knows something has changed.

Sending a Message to a Client

28. **Open the case via Manage** → —
29. **Scroll to the Messages section** —
30. **Confirm the "From" name is correct** — Default is Barr. David Chambers — change if needed
31. **Type your message in the text box** — Keep it professional and clear
32. **Click Send Message to Client Portal** — Client sees it immediately on next login

Adding an Invoice

33. **Open the case via Manage** → —
34. **Scroll to the Invoices section** —
35. **Enter Invoice Ref, Amount, Description and Status** — e.g. INV-2025-003 / ₦75,000 / Court Filing Fees / Due
36. **Click Add Invoice** — Client sees it in their Invoices tab immediately

Uploading a Document to the Client Portal

37. **Open the case via Manage** → —
38. **Scroll to Upload Document section** —
39. **Click Select File and choose a PDF, Word or image file** —
40. **Click Upload to Client Portal** — File appears in the client's Documents tab instantly
